

OEM Services from Network Allies

Today's competitive global market dictates that companies invest their resources more efficiently than ever. Remaining focused on core competencies is one way organizations are maintaining a competitive edge. By teaming with Network Allies, organizations can outsource non-core functions to increase efficiency, reduce operational costs and meet time-to-market goals.

Functioning as an extension of our client's organization, our OEM Services program helps clients operate in a lean, flexible fashion—allowing them to save time and money while reducing risk. OEM Services include system integration, software loading, testing, order fulfillment and deployment logistics. We also offer support in areas such as branding, configuration control, certification and compliance testing, manual and documentation production, and RMA & repair depot logistics.

New Product Introduction ♦♦ Production ♦♦ Deployment ♦♦ Support

- ♦ Worldwide Logistics
- ♦ Warehousing

Support

- ♦ Product Life Cycle Management
- ♦ RMA and Repair Depot
- ♦ Spare Pool Inventory Management
- ♦ Third-Party Interoperability Testing

Turnkey, Tested Solutions Equals Higher Productivity

If you are an Original Equipment Manufacturer (OEM) or an Independent Software Vendor (ISV), Network Allies can help streamline your organization and reduce risk. Having a turnkey, tested solution reduces your operational, administrative and installation costs which provides more dollars to invest in your core business. Additionally our program reduces the risks associated with out-of-box failures, component obsolescence, and part shortages.

System Design Support

If your organization is in the process of selecting a system platform for your product deployment, take advantage of our systems engineering team, which evaluate, test and rate a wide array of off-the-shelf platforms on an on-going basis. We also offer design services for those OEMs who have custom hardware requirements, both electrical and mechanical.

If you are an OEM or ISV looking to create a more competitive business model, Network Allies' OEM Services should be part of your plan.

To arrange a requirements consultation please call [978-771-6345](tel:978-771-6345) or email info@networkallies.com.
